Mid-Sized Office Building - Typical

Typical Problems:
1. Poor access to bus stop and sidewalks.
2. Parking creates poor pedestrian access to building.
3. Driveway entry is too close to intersection (safety issues).
4. No pedestrian connections to adjacent developments.

Transit-Compatible - Mid-Sized Office Building

Transit-Compatible Objectives:
1. Locating building near street corner improves access to bus stop.
2. Parking and driveways located behind building.
3. Building accessible from both rear parking and sidewalks.
4. Bus stop incorporated into plaza design.
5. Connections to neighboring activities.
