Planning Commission Recommendation

Proposed new language is underlined: language proposed to be deleted is lined through. Iterations of proposed amendments are accompanied by the source and date of the change from the original proposal (e.g., Staff, May 14, 2014).

Proposed amendments to the Imagine Bothell... Comprehensive Plan for the 2015 Periodic Plan and Code Update are presented in the format of the existing Plan, which was conceived primarily as a paper document. Insofar as the public has indicated a preference for online access to the Plan, staff contemplates some reformatting once the Update is completed, including added images and links, to optimize the usefulness of the Plan as an electronic document. No substantive changes to text or illustrations would be made in such a reformatting. The Plan will remain available as a paper document as well.

Staff 10/01/14 - This Subarea was formerly known as the Hollyhills/Pioneer Hills/Morning Side Subarea but was changed in 2010 (Ordinance 2053) to better reflect its primary geographic feature rather than the names of a few specific developments within the Subarea.

Staff 10/01/14 - Staff is proposing to change the Figures that are attached to each Subarea to both save GIS staff time and to create a more efficient and useful Comprehensive Plan. The proposal is to remove Figure 1 (Vicinity Map) which means that Figure 2 (Physical Geography) and Figure 3 (Aerial Photo) would become Figures 1 and 2, respectively. Figure 4 (Land Use designations) will become Figure 3 and will be updated as needed to reflect any land use designation amendments.

PC 10/01/14 - The Planning Commission concurs.

Bloomberg Hill Subarea Plan

Summary

The Plan for the Bloomberg Hill Subarea provides for the preservation of the single family residential character of the Subarea with opportunities for office-professional and multi-family residential development at the south end of the Subarea. The land use measures and capital facilities improvements proposed in this plan are intended to enhance the Subarea and promote city-wide goals and objectives. Highlights of the plan are intended to enhance the Subarea and promote city-wide goals and objectives. Highlights of the plan include the following:

▪ Recognition and continuation of the existing pattern of single-family development throughout most of the Subarea;

▪ Provision for multiple family, office-professional, and neighborhood business development along NE 180th Street;

▪ Coordination with the City of Woodinville on future improvements to 130th and 132nd Avenues NE;

▪ Development of an eastern gateway to the City on NE 180th, which is one of the primary entrances to the City;

▪ Development of pedestrian / bicycle trails that link this Subarea to a city trail network; and
Planning Commission Recommendation

- Pursuit of parks and recreation opportunities within the Subarea consistent with the goals, policies and actions of the Bothell Parks, Recreation and Open Space Action Program.

Subarea Profile

Location

The Bloomberg Hill Subarea is located in the eastern section of Bothell's Planning Area (see Figure 1). The majority of this Subarea is in King County, with about five percent in Snohomish County.

This Subarea occupies the plateau and western slope of Bloomberg Hill and is bordered on the north by 240th Street SE in Snohomish County; on the south by State Route 522 (SR-522) in King County; on the east by the Southwest Snohomish County Urban Growth Area in Snohomish County and the Woodinville city limits in King County; and on the west by the City of Seattle Skagit Transmission Line and the south and west property lines of the Hollyhills Mobile Home Park and Pioneer Hills subdivision, respectively.

The Bloomberg Hill Subarea adjoins two other Subareas: the North Creek / 195th Subarea is adjacent on the west and the Fitzgerald / 35th SE Subarea is adjacent on the north (see Figure 1).

The land within this Subarea is approximately 298 acres (0.472 square miles) in size.

Physical Geography

Slopes that exceed 15% extend from the top of Bloomberg Hill downward to the northwest and west into the North Creek drainage basin and to the southwest into the Sammamish River drainage basin (see Figures 12 and 3). The highest elevation in this Subarea is 300 feet, located in Snohomish County. This high elevation is part of a gently sloping plateau that comprises the majority of this Subarea. The lowest elevation is approximately 52 feet at the southwest corner of the Subarea.

Three sub-basin boundaries meet at approximately Hollyhills Drive NE near the center of the Morningside subdivision. The Little Bear Creek Sub-Basin divides the territory in half and extends to the east. The North Creek Sub-Basin extends to the northwest and west, and the Sammamish River Sub-Basin extends to the southwest.

Built Environment

Residential Development

With the exception of the area immediately north of NE 180th Street, the Subarea has a single family residential character, with site-built houses in Pioneer Hills, Morningside, Olympic Ridge, Woodlark Green, Stonebrook Meadows, Andalusia, Woodmark and several other neighborhoods; and manufactured and mobile homes in the Hollyhills neighborhood on fee simple lots. This area is interspersed with designated tracts of open space, underdeveloped land, and vacant land (see Figure 13). Areas north of and adjacent to NE 180th Street comprise multi-family development and professional offices.
Planning Commission Recommendation

Commercial Development

A professional office building is located immediately north of NE 180th Street.

Schools

Woodin Elementary School is located southwest of the corner of NE 195th Street and 130th Avenue NE. Just to the east of this Subarea is Woodinville Senior High School, on NE 195th Street and 136th Avenue NE.

Parks and Open Space

There is one City of Bothell mini park located in the Morningside neighborhood. The 0.7 acre Bloomberg Hill Park contains a sports court, play equipment and benches.

Historic Properties

A number of buildings in this Subarea have been recorded in Bothell's Historic Resources Inventory as potentially having historical significance.

Sanitary Sewer and Water

The majority of the Subarea receives potable water from the City of Bothell. The eastern portion receives water from the Woodinville Water District, and the portion north of the King / Snohomish County line is served by the Alderwood Water and Wastewater District. The City of Bothell's Bloomberg Hill water storage tank is located in the 12800 block of Hollyhills Drive.

Similarly, sanitary sewer service within the Subarea is provided by the City of Bothell, Woodinville Water District and Alderwood Water and Wastewater District, in the portions of the Subarea described above.

Storm / Surface Water

The City of Bothell is within the Greater Lake Washington / Sammamish / Cedar Watershed with is called the Water Resource Inventory Area (WRIA) 8.

All precipitation that falls within the Planning Area not absorbed into the soil or evaporated into the air becomes storm water runoff which eventually flows into the Sammamish River, Lake Washington, and eventually Puget Sound. Storm water runoff is conveyed to receiving waters (such as the Sammamish River) via a series of catch-basins, sub-surface pipes and drainage ditches. The City of Bothell has a storm water utility which maintains city-owned storm water runoff facilities, inspects privately-owned storm water facilities, and monitors surface water streams, creeks, and the Sammamish River for water quality and flow issues.

Utilities
Planning Commission Recommendation

The Subarea is served by natural gas, telephone, cellular phone service, cable TV and electricity. A liquefied petroleum pipeline conveying diesel, jet and other fuels is buried below ground within the Puget Sound Energy transmission tower (230 kV) Easement.

Transportation

The Subarea’s transportation system comprises streets, sidewalks/walkways, bicycle routes, and transit service. Each component is described in more detail below.

Streets

This Subarea is primarily served by two north-south streets - 132nd Avenue NE / 130th Avenue NE and Hollyhills Drive NE - and six east-west roadways - NE 180th Street, NE 182nd Place, NE 192nd Place, NE 195th Street, NE 205th Street and 240th Street SE.

Sidewalks / Walkways

There are no sidewalks/walkways in the Hollyhills Mobile Home Park area, but paved shoulders exist along Hollyhills Drive NE and join NE 192nd Place. The portion of NE 195th Street that runs along the school property has a sidewalk on the south side of the street and a sidewalk along the west side of 132nd Avenue NE.

The Morningside and Pioneer Hills housing subdivisions, located in the north and south portions of the Subarea, have sidewalks on both sides of the streets throughout their neighborhoods. The newer subdivisions along 130th Avenue NE, including Woodlark Green, Stonebrook Meadows, Andalusia and others, have internal sidewalks and sidewalks on 130th.

In the Snohomish County portion of the Subarea, the Olympic Ridge subdivision has internal sidewalks and a sidewalk on 240th Street SE.

A paved and separated pathway is located on the east side of 132nd Avenue NE for pedestrian and bicycle use up to NE 195th Street: there are intermittent sidewalks on the west side of 132nd. North of 195th on 130th Avenue NE, there are sidewalks on both sides of the street where subdivisions have been constructed, but the sidewalk system is not complete.

There is a sidewalk on the north side of NE 180th Street west of 132nd Avenue NE.

Bicycle Routes

As related above, there is one shared use path within this Subarea located along the east side of 132nd Avenue NE north to NE 195th Street. Bike lanes exist intermittently along the west side of 130th / 132nd Avenues NE. There is a continuous striped bike lane along the east side of 130th Avenue NE, although it is not signed.

Transit Service

Current transit service to the Subarea is provided by King County Metro along NE 180th Street, Hollyhills Drive, NE 192nd Street, 132nd Avenue NE and NE 195th Street. In addition, there is a bus stop on the westbound SR-522 on-ramp.
Bloomberg Hill Subarea Plan Elements

Land Use Policies

Note: Many of the Land Use policies are depicted on Figure 34, Land Use.

1. Maintain the overall single family residential character of the Subarea.

2. Land located along 130th Avenue NE in the northeast corner of the Subarea is appropriate for detached residential development at a minimum lot size of 5,400 square feet as described in Land Use Element Policy LU-P4 (R 5,400d in the northeast corner of map). This designation reflects existing development patterns and preserves development potential historically designated and zoned for this area under the jurisdiction of King County prior to annexation to Bothell.

3. Land located between NE 180th Street and NE 182nd Place, from 132nd Avenue NE west approximately 650 feet, is appropriate for attached or detached residential development at one dwelling unit per 2,800 square feet as described in Land Use Element Policy LU-P4 (R 2,800, OP in the southeast corner of map).

Staff 10/01/14 - Some refinement in the description of the following plan designations is necessary to reflect the approval of the Falcon View Plat which has 15 single family residential (R 5,400d) lots that are also designed R 2,800, OP, NB (they have dual designations). It is appropriate to assign an R 5,400d designation to these lots to reflect their actual use.

Further, Lot 16 of the Falcon View Plat is zoned R, 2,800, OP, NB and contains an office / retail building. Clarifying that this lot is zoned R 2,800, OP, NB to reflect its actual use is appropriate.

PC 10/01/14 - The Planning Commission concurs.

4. The upper hillside of the land located south of NE 182nd Place, from approximately 650 feet west of 132nd Avenue NE to approximately 1,000 feet west of 132nd that encompasses lots 1 through 15 and Tract A of the Falcon View Plat, is appropriate for detached residential development at a minimum lot size of 5,400 square feet as described in Land Use Element Policy LU-P4 (R 5,400d at south end of map).

5. The lower hillside of the land located along NE 180th Street, west of a point approximately 650 feet west of 132nd Avenue NE including lot 16 of the Falcon View Plat, is appropriate for attached or detached residential development at one dwelling unit per 2,800 square feet as described in Land Use Element Policy LU-P4 neighborhood business and office-professional development, (R 2,800, OP, NB at south end of map).
Planning Commission Recommendation

6. The following existing uses are assigned appropriate Plan designations: Woodin Elementary School, Civic-Education (CE in the east central portion of map); the pipeline and high-voltage electrical transmission wire corridors, Utility (U along the western edge and north end of map); and Bloomberg Hill Park, Park (P in north portion of map).

7. Land within the remainder of the Subarea is appropriate for continued detached residential development at a minimum lot size of 9,600 square feet as described in Land Use Element Policy LU-P4, (R 9,600 designation throughout much of the map).

Actions

No specific Land Use Actions have been identified for this Subarea. Refer to the Planning Area-wide Land Use Element.

Natural Environment

Policies

Staff 10/01/14 - The policy below identifies a desire to retain the wooded character of slopes as a means of providing erosion control, preserve wildlife habitat, and offer “visual relief” from development. However, the mechanism identified to achieve this objective is to apply impervious surface coverage allotments. Applying an impervious surface coverage allotment has the effect of reducing the amount of hard surfaces in the form of buildings and pavement, but does not necessarily conceal development because open lawn areas are not counted as impervious surfaces. Accordingly, a building surrounded by lawn and small shrubs is not “concealed” nor does it control erosion or provide wildlife habitat. However, preserving wooded areas with mature trees understory and intact soil horizons does achieve the stated purposes.

Staff recommends a substituting the impervious surface coverage allotment to a tree coverage/preservation allotment which directly achieves the objective of preserving wooded character of the slopes and concealing development.

PC 10/01/14 - The Planning Commission concurs.

1. Protect and preserve the hazardous slope critical areas in accordance with the critical areas regulations. Protect non-hazardous steep slopes located on the western and southern fringes of this Subarea in accordance with the Planning Area-wide Natural Environment and Urban Design Element policies and actions. These natural areas provide valuable erosion control, wildlife habitat, and visual relief from the built environment, and contribute to the identity of the Subarea. Maintain the wooded character of the slopes to give the visual appearance of open space and conceal development of the slopes from general view through the use of tree or forest retention impervious surface coverage allotments.

Actions
Planning Commission Recommendation

1. Monitor the above described areas for any environmental degradation and take remedial action where appropriate.

2. Extend public water and sewer services to replace on-site systems where feasible.

Housing and Human Services

Policies

1. Provide for a range of housing alternatives within the Subarea for persons of varying incomes and lifestyles. Reference is made to the Land Use policies above, which provide for housing types ranging from detached residential at minimum lot sizes of 9,600 square feet to attached residential at one dwelling unit per 2,800 square feet within the Subarea.

Actions

No specific Housing Actions have been identified for this Subarea. Refer to the Planning Area-wide Housing Element.

Economic Development

No specific Economic Development Element Policies or Actions have been identified for this Subarea. Refer to the Planning Area-wide Economic Development Element.

Staff 10/01/14 - The Parks and Recreation Element is proposed to be re-named the Parks, Recreation, and Open Space Element to match the Council-approved parks planning document. Revising the name of this Element is necessary.

Parks and Recreation and Open Space

Policies

1. Pursue acquisition and development of park sites and trail connections to serve the Subarea based on the City’s overall adopted level of service guidelines and the policies as contained in the Parks Recreation and Open Space Action Plan Element. It is recognized that such parks, while serving the needs of the residents of the Subarea, may or may not be located within the Subarea.

Actions
Planning Commission Recommendation

Parks and recreation projects to implement subarea and city-wide policies are identified and generally described in the Bothell Parks, Recreation and Open Space Action Program (PROSAP): from the PROSAP and other sources, the City Council selects projects for inclusion in the Bothell Capital Facilities Plan (CFP), which establishes types and amounts of funding and schedules projects for design and construction.

1. Include in the Capital Facilities Plan funding for acquisition and development of park(s) and trail connections to serve the Subarea.

Staff 10/01/14 - the Community Services Element is proposed to be removed from the Imagine Bothell… Comprehensive Plan and select policies from that element are to be located within a re-named Housing and Human Services Element. It is, therefore, appropriate to remove the policies and actions regarding community services and to re-locate them to the Housing and Human Services Element. The Policy below is adequately captured within the City-wide Housing and Human Services Element as a City-wide policy and can be removed from this subarea.

Community Services

Policies

1. Promote the use of Woodin Elementary School for before and after school day care and as a drop in community center for various age and interest groups

Actions

1. Continue discussions with the Northshore School District to promote the preceding policy.

Historic Preservation

Policies

1. Whenever a structure or property listed on the City’s historic inventory or register is proposed to be modified or removed, the City shall review, investigate and implement appropriate mitigation measures consistent with the policies and actions of the Historic Preservation Element and any implementing regulations.

Actions

No specific Historic Preservation Element Actions have been identified for this Subarea. Refer to the Area-wide Historic Preservation Element.
Urban Design

Policies

1. Any future improvements to 130th / 132nd Avenue NE should be so designed and coordinated as to provide a pleasing shared gateway to the cities of Bothell and Woodinville. Additionally, gateway improvements should be considered for NE 180th Street as it enters Bothell.

2. If large areas of impervious surface are necessary, landscaping shall be extensively utilized to avoid negative visual impacts on the surrounding areas including adjacent upland and slope areas.

3. Lighting use for safety and convenience shall be the minimum necessary and shall be screened to eliminate glare for drivers and for adjacent residences.

4. Predominant views, both from and to the hillside areas, shall be preserved in order to retain the natural character and the sense of identity that the hillside areas now impart. Visual impact studies shall be provided by developers detailing the effects of grading, tree removal, building and parking placement and streets proposed in development plans.

5. Buildings shall be contoured to the hillside for maximum integration with the site and padding or terracing of building sites in the hillside areas is discouraged.

6. The layout of the development, including the location of buildings and streets, shall be designed to effectively preserve the natural terrain and tree cover and minimize site grading.

Actions

1. Work with the Washington State Department of Transportation to encourage that agency to heavily landscape the area within its right-of-way.

Annexation

Policies

Staff 10/01/14 - With the King County annexations now complete, this policy should be revised to reflect the fact that the annexation has occurred. However, because the retention of “Woodinville” addresses was important to those effected residents, Staff recommends retaining this policy. The companion action can be removed since the City has affirmed this desire with the Bothell and Woodinville Post Offices.

PC 10/01/14 - The Planning Commission concurs.

1. Portions of the Subarea currently served by the Woodinville Post Office on the basis of routing efficiencies or other considerations by the United States Postal Service (USPS) should retain Woodinville addresses following annexation to Bothell.
Actions

No specific Annexation Actions have been identified for this Subarea. Refer to the Planning Area-wide Housing Element.

1. Upon annexation, affirm the above policy with the Bothell and Woodinville Post Offices.

Utilities and Conservation

Policies

1. The City shall promote the use of utility rights-of-way for recreational use.

2. The City should work cooperatively with other jurisdictions to establish and monitor safety procedures for the Liquefied Petroleum pipelines to the maximum extent possible under federal regulations.

3. Future replacement towers for transmission lines and expansion of existing substations or construction of new substations should be designed to minimize aesthetic impacts on the neighborhood.

Actions

1. The City shall work with electricity and other utility providers to develop utility line rights-of-way into pedestrian/equestrian/bike trails.

2. Participate regionally in establishing petroleum pipeline safety procedures whenever a pipeline crosses a public right of way or when construction occurs within the pipeline easement.

3. The City shall work with electricity providers to implement policy 3 above.

Transportation

Policies

Note: Certain Transportation Policies are graphically depicted on the Arterials, Bicycle Route and Pedestrian Facilities maps; Street Cross-sections; and other figures included in the Planning Area-wide Transportation Element.

1. The following roads within the Subarea are classified as arterials:

   Freeway / Limited Access Highway  SR-522
2. The following bicycle routes should be designated for the Subarea:

   Separated Route (Shared Use Path)  None 132nd Avenue NE Pathway

   Striped and/or Signed Route (Bicycle lane or Shared Roadway)  NE Hollyhills Drive
   NE 180th Street
   NE 205th ST
   47th Avenue SE
   240th Street SE

3. Bicycle routes should be signed as soon as possible.

4. NE 180th Street is part of the proposed Bothell Boulevard system. Any future improvements to this street should include median landscaping islands, landscaping between the street and sidewalks, a coordinated street tree program, and meandering sidewalks/walkways, if practical.

5. Except in limited circumstances all new development will be required to install sidewalks. Sidewalks should be constructed of concrete for durability and to reduce long-term maintenance costs, and should be separated from the street by landscaping wherever possible.

6. Sidewalks/walkways within the Hollyhills Mobile Home Park may not be desired by Hollyhills residents if the construction of sidewalks/walkways would intrude into residents' yards and decrease privacy. In lieu of these improvements, the City should place funding emphasis on neighborhood traffic calming measures, including speed limit enforcement and painting of speed humps to enhance visibility.

7. Bicycle routes should be signed as soon as possible to meet Shared Roadway standards until construction to Bicycle Lane standards are completed.

8. Coordinate with neighboring jurisdictions on the planning, funding, and implementation of transportation improvements to address shared transportation needs and concerns.

**Staff 10/15/14** - The policies below are planning area-wide policies that should be and are sufficiently articulated located within the Planning Area-Wide Transportation and Urban Design Elements. Staff is recommending these policies related to topography and a connected network of streets are more appropriately located within the Transportation and Urban Design Elements. There is no need to place these city-wide policies within each individual subarea plan.

**PC 10/01/14** - The Planning Commission concurs.

9. Due to the difficult topography within Bothell's neighborhoods and the reality that a grid system within Bothell's residential neighborhoods encourages cut-through traffic, it is the policy of the City
Planning Commission Recommendation

of Bothell that the residential street pattern shall not emphasize a grid or connected network of streets that would promote neighborhood cut-through traffic, but should accommodate non-motorized connections and emergency and life safety access.

10. It is the policy of the City of Bothell to support a connected network of streets within Bothell’s community activity centers and other commercial areas so long as these connections do not encourage or promote residential neighborhood cut-through traffic.

940. Land under the transmission lines bordering the west of this Subarea should be used for pedestrian/equestrian/bike trail use.

102. Coordinate traffic calming and other measures and pedestrian safety improvements with subarea residents in accordance with the City’s Traffic Calming Program including speed reduction in the subarea including along Hollyhills Drive and 130th/132nd Avenues NE and transportation improvements at the NE 205th ST/130th Avenue NE intersection.

Actions

Transportation projects to implement subarea and city-wide policies are identified and generally described in the Bothell Transportation Improvement Plan (TIP): from the TIP and other sources, the City Council selects projects for inclusion in the Bothell Capital Facilities Plan (CFP), which establishes types and amounts of funding and schedules projects for design and construction.

1. Incorporate projects which implement the above policies into the City’s Transportation Improvement Program (TIP) and into the Capital Facilities Plan (CFP).

2. Work with the City of Woodinville and King County to coordinate future improvements of 130th and 132nd Avenues NE.

3. Work with the City of Woodinville and the Washington State Highway Department of Transportation to coordinate future improvements at the SR-522/SR-202 interchange area. These improvements should enhance safety for bicyclists and pedestrians on the 132nd Avenue NE bridge over SR 522.

4. Erect signage to designate 130th/132nd Avenues NE as bicycle routes.

5. Investigate and, if feasible, provide continuous sidewalks/walkways on 195th Street/Hollyhills Drive.

6. Investigate and, if feasible, provide the following bike lanes along 205th Street SE from:
   - 130th Avenue NE to 47th Avenue SE in Snohomish County;
   - NE 195th Street/Hollyhills Drive east from 120th Avenue NE; and
   - NE 180th Street west of 132nd Avenue NE.

7. Work with easement benefactors and individual property owners to allow land under the transmission lines bordering the west of this Subarea to be used for pedestrian/equestrian/bike trail use.

8. Consider traffic calming measures to promote safety including speed reduction along Hollyhills Drive in accordance with the City’s Traffic Calming Program and 130th/132nd Avenues NE and transportation improvements at the NE 205th ST/130th Avenue NE intersection.

9. Encourage bicycle facilities along the following corridors:
Planning Commission Recommendation

- 130th/132nd Avenue NE connected from 47th Avenue SE in Snohomish County to SR-522;
- NE 195th Street east from 130th Avenue NE; and
- NE 195th Street west from 120th Avenue NE.

Capital Facilities

Capital facilities projects to implement subarea and city-wide policies (other than parks and recreation and transportation projects, discussed separately above) are selected by the City Council for inclusion in the Bothell Capital Facilities Plan (CFP), which establishes types and amounts of funding and schedules projects for design and construction.
